

 citifarm™

CHEF

**A FARM IN YOUR
KITCHEN, SHOP
& RESTAURANT**

Adds value, looks great,
tastes even better...
functional food theatre

BY V-FARM

Citifarm is a great creative tool within your kitchen and when installed in the restaurant, creates new visual food conversations with your customers - **adds freshness, adds interaction, adds value.**

The Citifarm is functional food theatre. Added-value experiences are created as you pick leaves in front of customers for their dishes. It generates raised media profile from food bloggers and customers who are active on social media.

Installing Citifarms within the consumer space makes a statement about your intentions as a business. It demonstrates your commitment to serving the best tasting, freshest food while minimising environmental impact.

Choose from our creative assortment of raised taste and aroma salad greens, microgreens and herbs - many of which are not available from conventional suppliers. Delicious, fast growing and highly nutritious.

citifarm™ by V-Farm

At V-Farm we're all about growing the perfect crop. That's why we've spent so long developing the perfect system to keep those plants happy.

Introducing Citifarm, the app controlled vertical farm that allows you to grow fresh crops on site with little effort and low energy demand.

Our systems draw customers in and add a whole new layer of excitement and value, regardless of whether you're a supermarket, cocktail bar, restaurant or salad bar.

Grow and harvest what you require meaning little to no food waste. Reduced packaging, reduced food miles and zero pesticides.

Pre-programmed crops and colour coded grow modes make it very simple to use

Looks great under our custom LEDs

Quick access with pull-out drawers

Can be grown all year round

Easy to grow through our app. No soil, no repotting, just sow and press grow

Citifarm plugs into a standard 13 Amp wall socket and connects to your Wi-Fi.

We are looking for forward thinking, creative businesses to work with us. First production units will be ready for install in Summer 2020. These initial units will be sold at a reduced 'beta testing' price. Go to www.v-farm.co.uk/beta to order your units now.

Following initial install, we are aiming to offer units under a rental package that will include free installation and repairs, a monthly consumables package, bi-annual deep clean and access to all our tailored 'grow' recipes.
