# GYM

**SUPER FOOD SALADS  
& TURBO GREEN  
SMOOTHIES**

Adds value, looks great,  
tastes even better...  
functional food theatre

BY V-FARM

At your gym, the trainers and classes sell memberships, but nothing seals the deal quite like upscale amenities.

One of the most appealing perks you can offer of all is an on-site smoothie, juice or health food bar.

The Citifarm enables you to grow microgreens and nutritious superfoods onsite, increasing freshness and value to the drinks and food served at your gym.

Your Citifarm microgreens will be a superfood revelation to any early morning gym goer or a tired attendee of an afterwork spin class in need of a pick-me-up.

## citifarm™ by V-Farm

At V-Farm we're all about growing the perfect crop. That's why we've spent so long developing the perfect system to keep those plants happy.

Introducing Citifarm, the app controlled vertical farm that allows you to grow fresh crops on site with little effort and low energy demand.

Our systems draw customers in and add a whole new layer of excitement and value, regardless of whether you're a supermarket, cocktail bar, restaurant or salad bar.

Grow and harvest what you require meaning little to no food waste. Reduced packaging, reduced food miles and zero pesticides.

**Pre-programmed crops and colour coded grow modes make it very simple to use**

**Looks great under our custom LEDs**

**Quick access with pull-out drawers**

**Can be grown all year round**

**Easy to grow through our app. No soil, no repotting, just sow and press grow**

Citifarm plugs into a standard 13 Amp wall socket and connects to your Wi-Fi.

We are looking for forward thinking, creative businesses to work with us. First production units will be ready for install in Summer 2020. These initial units will be sold at a reduced 'beta testing' price. Go to [www.v-farm.co.uk/beta](http://www.v-farm.co.uk/beta) to order your units now.

Following initial install, we are aiming to offer units under a rental package that will include free installation and repairs, a monthly consumables package, bi-annual deep clean and access to all our tailored 'grow' recipes.
